1986 National Childhood Vaccine Injury Act

The 1986 Act was passed to eliminate the financial liability of vaccine manufacturers, due to vaccine injury claims, in order to ensure a stable market supply of vaccines, and to provide cost-effective arbitration of vaccine injury claims. It states, "No vaccine manufacturer shall be liable in a civil action for damages arising from a vaccine-related injury or death associated with the administration of a vaccine after the effective date of this subtitle if the injury or death resulted from side effects that were unavoidable even though the vaccine was properly prepared and was accompanied by proper directions and warnings."
